# INTRODUCTION

In determining living standards, income and consumption are the most popular approaches. Income refers to earnings from productive activities and current transfers. Measuring consumption over a week or month provides an indication of a household's consumption habits over a year because it has a smooth flow to it in other words it is steady. Income however, tends to vary widely from week to week or month to month. Consumption data is much easier to collect than income data, particularly in agricultural communities or with self-employed persons. Consumption is therefore a better indicator of living standards.

The consumption pattern of a country depicts the aggregate demand of goods and services in the country, and in most cases it constitutes about 60 percent of the total GDP of the country. Consumption pattern also depicts the level of welfare and poverty that a nation is experiencing. This report is based on the Nigeria Living Standard Survey (NLSS) 2018/2019.

**The purpose of this report is to portray household consumption expenditure types by food and non-food items at the national, zonal level, and state level, and also the urban/rural split.**

The amount of money spent on consumables will be used in the computation of final household expenditure which is a component of our gross domestic product (GDP) compilation. The computation of GDP through the expenditure approach will not be complete without the household consumption/expenditure input. It is worth noting that, when a country is experiencing a downturn trend, it implies that the aggregate demand (consumption) is very low, poverty incidence is on the increase, unemployment rate rises, investments fall drastically and prices of goods and services will most likely rise too. On the other hand, when the aggregate demand (consumption) is high, firms will invest and be ready to employ idle resources, prices will fall (due to an increase in the supply of goods and services) and other economies of scale will be accrued to the nation as a result of the large size of its aggregate demand.

## Consumption Patterns in Nigeria

The consumption pattern of a household is the combination of qualities, quantities, acts and tendencies characterizing a community or a human group's use of resources for survival, comfort and enjoyment. Of course the type of food and non-food items consumed, vary from region to region. Consumption patterns normally contribute greatly to the social and economic policy of the country. For a developing country like Nigeria, the consumption pattern is skewed towards food i.e. food is higher than the non-food items. In most developed countries, it is the opposite, where the consumption pattern is skewed towards non-food items. The more developed a society becomes, the less it spends on food and the more it spends on non-food items. Lagos is a clear indication of a state with an emerging economy. Lagos state's expenditure on

*Note that the rural urban split in this report is based on the latest official published split by the National Population Commission which is 1991 and accordingly is subject to revision following updates from the Population Commission.*

non-food items was more than its expenditure on food.

This report will avail researchers and policy makers the opportunity to test whether the consumption patterns of a state or zone, correlates with food items using valid statistical theory. Specifically, this report will open further examination of consumption /expenditure patterns within the country as it portrays the level of welfare (poverty).

Consumption patterns differ from one zone to another. Zonal variation exists at a close examination of a representative state within one zone when compared with another state within another zone. These zonal variations can be statistically explained as the states within each zone having similarities in consumption patterns. There are however variations where some states do not follow the same pattern and that is not unusual.

# SURVEY METHODOLOGY

## Objectives of the Survey

The National Living Standard Survey (NLSS) was part of an effort of the Federal Government of Nigeria to provide statistical information on welfare and poverty trends in the country. The survey was designed to collect information needed to identify and classify target groups and provide basic welfare indicators for monitoring poverty alleviation programmes. The specific objectives of the survey are to:

- provide valid and reliable data for the development of effective intervention and provision of important tools for designing implementing and monitoring of economic growth and poverty reduction;
- generate qualitative and quantitative data on poverty and welfare situations at the federal and state levels;
- collect baseline information on the character and nature of poverty for monitoring and evaluating impact of poverty reduction programmes;
- identify priority indicators of living standards for households and household members;
- establish a database on poverty monitoring systems that will be updated continuously;
- provide a comprehensive analysis for identification and targeting of the poor by different localities;
- give in-depth enquiry into the structure and distribution of expenditures of Nigerian households; and
- present and disseminate National Poverty report, giving the highlights of Statistical findings and results of in-depth analysis, understanding required to promote a sustainable campaign against poverty at the National and State Levels.

## Coverage

1. The survey was a nation-wide activity, covering all 36 States of the Federation and the Federal Capital Territory (FCT).
2. Between September of 2018 and October of 2019, the National Bureau of Statistics (NBS) conducted the latest round of the NLSS after a decade. It is representative at the state level with a sample size of 22,110 households, focusing on increasing the understanding of living conditions of the Nigerian population. The survey collected data on household and individual demographics (age, gender, marital status, among others), access to education, health and basic services, employment, assets, and income. The survey is used to determine consumption expenditure patterns as well as the prevalence of poverty and inequality and to estimate a wide range of socio-economic indicators including benchmarking of the Sustainable Development Goals.
3. Several important methodological improvements were implemented in NLSS 2018-19 compared

*With the exception of Borno state, where security issues prevented collecting a representative sample.*

to the last official survey from 2009-10. First, the NLSS was designed and collected using Computer Assisted Personal Interviewing (CAPI) software on tablet devices. This significantly improved quality and speed of data collection and processing. Second, by administering a seven-day recall food consumption module instead of a month-long diary (as done previously), the survey improved accuracy and cost-effectiveness of collecting food expenditures data. In addition, extra effort was made to measuring food quantities where households used non-standard units of measurement that resulted in better quantification of food consumption.

4. These improvements in questionnaire design and survey implementation techniques have produced an overall outcome of high-quality data. With the support of the World Bank, the NBS adopted best practice in the collection and processing of household data. As is often the case, making such improvements often comes at the expense of giving up some degree of comparability with past rounds while achieving high standards in survey practice. Recognizing the benefits that come with a better survey infrastructure, a deliberate decision was made to use NLSS 2018-19 as a new and improved baseline for Nigeria's living standards survey system. One key indicator of survey quality is whether households agree to participate in the survey. The NLSS had an impressive response rates of over 95 percent.

It was designed to investigate both urban and rural areas (as classified by the National Population Commission) of all the 774 Local Government Areas (LGAs) of the country

# DATA ANALYSIS

## Classification of Food and Non-food Items

In developing the consumption pattern report for Nigeria, 122 food items have been classified into 15 major groups based on the Nigerian food basket. The table below provides the food and non-food classifications. 132 non-food items have been classified into 10 major groups.

**Table 1: Food and Non-Food Classification 2019**

<b>I</b>	<b>GRAINS AND FLOURS</b>	<b>VI</b>	<b>FRUITS</b>
	Guinea corn/sorghum		Bananas
	Millet		Orange/tangerine
	Yam flour		Mangoes
	Cassava flour		Avocado pear
	Wheat flour		Pineapples
	Other grains and flour (specify)		Fruit canned
<b>II</b>	<b>BAKED/PROCESSED PRODUCTS</b>		Other fruits (specify)
	Bread		Pawpaw
	Cake		Watermelon
	Buns/Pofpof/Donuts		Apples
	Biscuits		Guava
	Meat Pie/Sausage Roll	<b>VII</b>	<b>VEGETABLES</b>
<b>III</b>	<b>STARCHY ROOTS, TUBERS &amp; PLANTAIN</b>		Tomatoes
	Cassava - roots		Tomato puree (canned)
	Yam - roots		Onions
	Gari - white		Garden eggs/egg plant
	Gari - yellow		Okra - fresh
	Cocoyam		Okra - dried
	Plantains		Fresh Pepper
	Sweet potatoes		Dry Pepper
	Potatoes		Leaves (Cocoyam, Spinach, etc.)
	Other roots and tuber (specify)		Other vegetables (fresh or canned) (specify)
<b>IV</b>	<b>PULSES, NUTS AND SEEDS</b>	<b>VIII</b>	<b>POULTRY AND POULTRY PRODUCTS</b>
	Soya beans		Chicken
	Brown beans		Duck
	White beans		Other domestic poultry
	Groundnuts (Unshelled)		Agricultural eggs
	Groundnuts (Shelled)		Local eggs
	Other nuts/seeds/pulses (specify)		Other eggs (not chicken) (specify)
	Coconut	<b>IX</b>	<b>MEAT</b>
	Kola nut		Beef
	Cashew nut		Mutton
<b>V</b>	<b>OIL AND FATS</b>		Pork
	Palm oil		Goat
	Butter/ Margarine		Wild game/bush meat
	Groundnuts Oil		Other meat (excl. poultry) (specify)
	Other oil and Fat (specify)	<b>X</b>	<b>FISH AND SEAFOOD</b>
	Sheabutter		Fish - fresh
	Animal fat		Fish - frozen
			Fish - smoked
			Fish - dried
			Snails
			Seafood (lobster, crab, prawns, etc)
			Canned fish/seafood
			Other fish or seafood (specify)

<b>XI</b>	<b>MILK AND MILK PRODUCTS</b>
	Fresh milk
	Milk powder
	Baby milk powder
	Milk tinned (unsweetened)
	Cheese (wara)
	Other milk products (specify)
<b>XII</b>	<b>COFFEE, TEA, COCOA AND THE LIKE BEVERAGES</b>
	Coffee
	Chocolate drinks (including Milo)
	Tea
<b>XIII</b>	<b>SUGAR, SWEETS AND CONFECTIONARY</b>
	Sugar
	Honey
	Other sweets and confectionary (specify)
<b>XIV</b>	<b>OTHER MISCELLANEOUS FOODS</b>
	Salt
	Unground Ogbono
	Ground Ogbono
	Ground Pepper
	Melon (shelled)
	Melon (unshelled)
	Mellon (ground)
	Other spices
<b>XV</b>	<b>NON-ALCOHOLIC DRINKS</b>
	Bottled water
	Sachet water
	Malt drinks
	Soft drinks (Coca Cola, Mirinda, etc)
	Fruit juice canned/Pack
	Other non-alcoholic drinks (specify)
<b>XVI</b>	<b>ALCOHOLIC DRINKS (BOTTLE AND CAN)</b>
	Beer (local and imported)
	Palm wine
	Pito
	Gin
	Other alcoholic beverages
<b>XVII</b>	<b>RICE</b>
	Rice - local
	Rice - imported
<b>XVIII</b>	<b>MAIZE</b>
	Maize flour
	Maize (Unshelled/On the cob)
	Maize (Shelled/On the cob)
	Maize (Shelled/Off the cob)
<b>XIX</b>	<b>FOOD CONSUMED OUTSIDE OF HOME</b>
	Breakfast
	Lunch
	Dinner
	Side dishes like pepper soup, nkwoobi, suya, isiewu, asun etc.
	Snacks such as sandwiches, biscuits, meatpies, donuts, popof, akara, etc.
	Dairy based beverages such as milk, yoghurt, fura etc.
	Vegetables and roasted or boiled items (such as carrot, pears, boiled/roasted corn, roasted plantain, sugar cane, roasted yam etc.)
	Non alcoholic drinks (Coke, Fanta, zobo, kunu, etc.)
	Alcoholic drinks (palm wine, beer, etc.)

<b>I</b>	<b>TRANSPORT</b>
	Public transport (bus, rail, boat, etc) EXCLUDE EDUCATION RELATED EXPENSES
	Motor vehicle service
	Tyres
	Car battery
	Bicycle service, repairs
	Other transport repairs
	Air fares
	Other fares
	Storage
<b>II</b>	<b>FUEL/LIGHT</b>
	Kerosene
	Palm Kernel Oil
	Gas (for lighting/cooking)
	Other liquid cooking fuel
	Electricity, including electricity vouchers
	Candle
	Firewood
	Charcoal
	Petrol
	Diesel
	Other solid fuel
	Lubricants (oil, grease, etc)
<b>III</b>	<b>WATER</b>
	Water
<b>IV</b>	<b>ENTERTAINMENT</b>
	Cigarettes or tobacco
	Matches
	Gambling, lotto, raffles
	Recreational (Cinemas, video/DVD rental, cinema, video house, concerts)
	Other recreational
	Batteries (small radio type)
	Musical instruments
	Jewelry, watches, rings
	Sports equipment
	Other personal sporting items
	Night's lodging in rest house or hotel
<b>V</b>	<b>SERVICES</b>
	Wireless communication items
	Service of beauty saloon
	Service of barber
	Postal (inlc. Stamps, etc)
	Recharge cards
	Landline charges
	Internet Services
	Wages paid to staff/maid/lawnsboy
	Other housing charges (excl. water, fuel and power)
	Financial services (N.E.S.)
	Repairs & maintenance to dwelling
	Repairs to household and personal items (radios, watches, etc.)
	Laundry (excluding soap, detergent)
	Cell phone hand set
	Personal computer
	Other communication equipments
	Life insurance
	Health insurance
	Education insurance
	Other insurance

<b>VI</b>	<b>HOUSEHOLD GOODS</b>
	Light bulbs/globes
	Soap and Washing powder
	Toilet paper
	Insecticides, disinf
	Other non-durable goods
	Personal care goods
	Vitamin supplements
	Other health supplement
	Cleaning utensils (brooms, brushes, etc.)
	Other household utensils
	Electric kettle
	Food processor and etc
	Coal pot/other non-electric app
	Other appliances (specify)
	Repairs of appliances
	Torch / flashlight
	Umbrella
	Paraffin lamp (hurricane or pressure)
	Stationery items (not for school)
	Books (not for school)
	House decorations
	Bed sheets, bed cover, blanket,
	Pillow
	Curtain and other linen
	Carpet and other floor covering
	Other furniture and fixtures
	Repairs of soft furnishings
	Repairs of furniture and fittings
<b>VII</b>	<b>CLOTHING AND FOOTWEAR</b>
	Infant Clothing
	Baby nappies/diapers
	Children Tailored clothes
	Children dress (ready made)
	Adult Tailored clothes
	Adult dress (ready made)
	Suits
	Other ready-made
	Smock and other hand woven
	Blouse, Shirts
	Raincoat
	Other clothing (specify)
	Repairs of clothing
	Tailoring charges
	Ankara, George materials
	Cotton
	Silk
	Hand loomed: ASO-OKE
	Polyester material
	Wool
	Other clothing materials
	Shoes
	Sandals - leather
	Sandals (rubber type)
	Other footwear
	Repairs of footwear

<b>VIII</b>	<b>EDUCATION</b>
	Newspaper and magazines
	Tuition/school fees
	Exam, registration and other official fees
	<b>PTA, SMC, and other association fees</b>
	<b>Contribution to construction, maintenance or other school funds</b>
	<b>Cash estimates of in-kind contributions</b>
	<b>School canteen fees</b>
	<b>School boarding fees</b>
	<b>Fees for transport organized by the school</b>
	<b>Fees for health services</b>
	<b>Uniform and other required clothing</b>
	<b>Text books</b>
	<b>Other required education materials</b>
	<b>Private tutoring</b>
	<b>Transportation to and from school</b>
	<b>School meals purchased outside school</b>
	<b>Additional books, computer, or learning software to be used at home</b>
	<b>Music and arts lessons</b>
	<b>Gifts</b>
<b>IX</b>	<b>HEALTH</b>
	Consultations
	Transportation to and from the first consultation
	Drug over the counter
	Hospital
	Bednet
<b>X</b>	<b>RENT</b>
	Actual rent paid
	Imputed rent

## Summary Indicators

### National Classification

At the national level the total household expenditure on food and non-food for 2019 was **N40,207,388,459,367** (N21,620,601,543,613.90 in 2009/10). Of this total, 56.65% (60.2% in 2009/10) of total household expenditure in 2019 was spent on food with the balance of about 43.35% (39.8 % in 2009/10) spent on non- food items. Food consumed outside the home, followed by transportation costs and starchy roots, tubers and plantains were responsible for the largest proportion of household expenditure representing a combined 24.16 percent of total household expenditure in 2019.

Further analysis of food expenditure by households in 2019 reveals that various foods consumed outside the home, starchy roots, tubers and plantains, rice, vegetables, fish and sea food, grains and flours in that order were the top food items households spent on in 2019 accounting for a combined 59.19% of food expenditure and 33.53% of total household expenditure on food and 24.8% of total household expenditure. Household expenditure on non-food items on the other hand were directed as aforementioned mostly at transport, health, education and services (which includes information technology and communication equipment as well as things like insurance, financial services and so on), rent and fuel and light, accounting for a combined 79.40% of non-food expenditure.

**Table 2: Household Expenditure by Type of Commodity: National 2019**

### Urban/Rural Classifications

Urban/Rural split is based on the official classification adopted by the National Population Commission which determines which location is termed urban and rural.

Total household expenditure in urban areas in 2019 stood at **N19,113,569,558,086 (N8,412,656,254,286 in 2009/10)**, relative to **N21,093,818,901,281 (N9,364,312,669,993 in 2009/10)** in the rural areas.

Against this backdrop total expenditure on food in urban areas stood at **N9,847,690,798,340** in 2019 (**N3,654,003,234,722** in 2009/2010), while in rural areas it was **N12,929,558,844,031 (N9,364,312,669,993)**. Both areas spent mostly on food outside the home, Starchy foods, tubers, and plantains, and rice representing about 37.96% for rural and about 42.59% for urban areas of total expenditure on food. In the non-food section, education, transport, services and rent represented the highest expenditure for urban households while expenditure on health, transport, education and services dominated non-food household expenditure in 2019.

## Urban/Rural Classifications

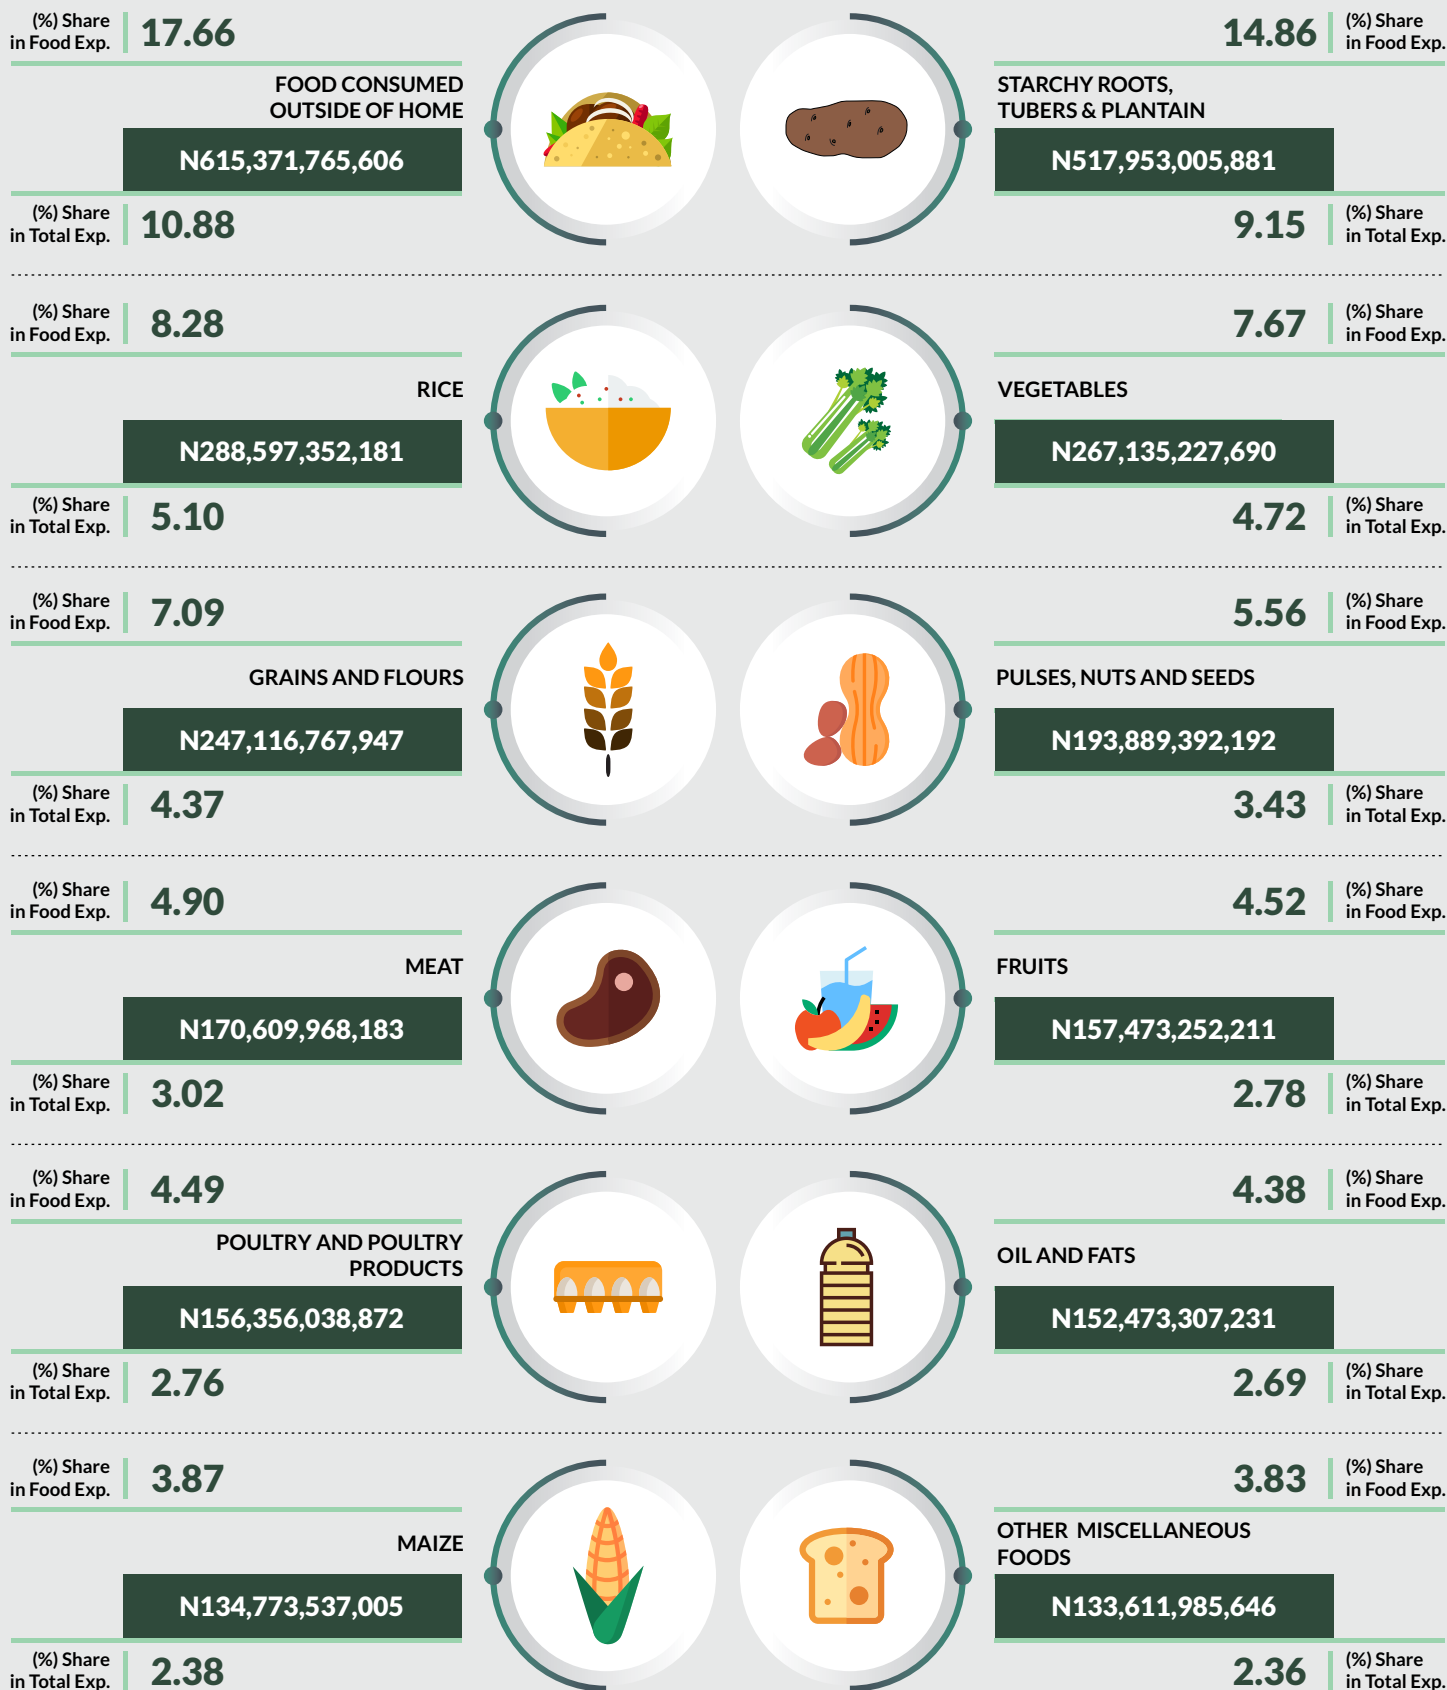

Further disaggregation by the 6 geo-political zones reveals that the South-West region recorded the highest overall household expenditure as well as the highest expenditure on food and in non food categories, while the North East (excluding Borno) recorded the lowest. As can be seen in the table below, the South-West at about 29.95% of total expenditure, South South at 20.94% and North West at about 17.02% recorded the highest expenditure in 2019. These three regions were therefore responsible for over 67% of total consumption expenditure in the country in 2019.

**Table 5: Consumption Pattern of Households by Zone**

Zone	Food Expenditure	% of Total Food Exp	Non-Food Expenditure	% of Total Non-Food Exp	Total Expenditure	% of Total Expenditure
1. North Central	3,484,988,423,566.00	15.30	2,173,274,796,790.00	12.47	5,658,263,220,356.00	14.07
